

IBISWorld for Accounting

“IBISWorld saves time and is a first point of reference. It gives us key data and trends that prompt further investigation with regard to client matters.”
Rothsay Chartered Accountants

IBISWorld provides industry intelligence that analyses the performances of 700+ Australian industries.

Each industry report provides the most detailed performance data and analysis on the market, including supply chain information, forecasts, risk scores, operating strengths and weaknesses, analysis of external drivers, major player market strategies, and industry profit and cost benchmarks.

Our report titles are based on the four-digit level of the Australian New Zealand Standard Industry Classification.

IBISWorld is an online industry solution. Reports are updated up to four times per year, and are available in three user-preferred lengths: four-page iExpert Summaries, Industry Reports of 40 pages and 20-page Risk Rating Reports. Our strategic database covers all reports to give you a bird's-eye view of the economy. Report data and analysis can be downloaded as value-added content for your presentations.

IBISWorld's extensive report collection has the answers that cut hours from first-stage project research, help you identify and win new business, and deliver client-relevant messages that strengthen existing relationships.

A firm-wide solution

Audit and attest: IBISWorld data is used in planning and risk assessment, and for compilation of the management letter. Reports are independent and give an in-depth view of a client's industry risks, opportunities, outlook and trends. Auditors can quickly benchmark a client's performance against an industry and prepare a stronger industry segment of an audit plan faster.

Business valuations/M&A: IBISWorld reports contain sections that address six of the 14 factors affecting the value of a business that are used in many valuation models. Our comprehensive coverage allows valuation practitioners to save research time on niche

industries not available elsewhere. Archived reports are also available to research historical industry conditions.

Turnaround management: Use our four-page iExpert Summaries to get up to speed on industry threats and opportunities in a matter of minutes.

Forensic litigation: Our archived industry reports help you determine the prevailing conditions from when business decisions in question were made.

Business advisory/consulting: Add value by preparing and educating your clients to face upcoming threats and opportunities.

IBISWorld behind the scenes

IBISWorld industry and risk intelligence will inform your strategic planning and thought leadership. Our Industry Database provides a bird's-eye view of the Australian economy and details at the granular level, allowing you to search all industries, or a specific sector, and download the results for further analysis.

Our reports also help with business development and marketing to potential clients. For example, you will be able to identify firms in industries that are growing or declining rapidly, facing consolidation, or experiencing changing regulations, globalization, taxation or technology.

IBISWorld's industry research is a valuable tool for preparing proposals for new business as well. Use iExpert Summaries to help client-facing staff prepare for meetings and get up to speed on industry conditions in a matter of minutes. Partners also use our 12-month Risk Rating forecasts and analysis for Enterprise Risk and Risk Assessment.

IBISWorld provides you with a single numerical score to help you identify the potential risks of accepting client engagement and understand the risks facing your existing client portfolio.
